

I, Scott Teresi, a web developer in Columbus, Ohio, respectfully urge Congress to extend the wind energy production tax credit (PTC) as quickly as possible.

The amount of wind capacity in Ohio is estimated at 152TWh per year (not including offshore capacity of Lake Erie). This is almost enough to cover Ohio's entire electricity demand!

The PTC drives billions of dollars in private investment in homegrown American wind power each year. I have seen the wind farm near my house revitalize my community – bringing in construction jobs at first, and maintenance jobs in the long term, and generating revenue for our community schools and hospitals over the lifetime of the project. Increasing the amount of power that our country gets from clean, homegrown, affordable resources is an excellent thing for us to do – and this tax credit provides an incentive for the wind industry to continue to do just that.

I urge the committee to take up an extension of the wind energy production tax credit right away.
